SUBJECT: Amen Corner _ Pilot Program _ H2S Removal

Testimonial – Ameredev Operating, LLC

“We engaged Alexandros, Inc. to conduct a comprehensive decontamination pilot project for H₂S removal from our produced water streams at the Amen Corner Facility in June 2022. The goal was to test and evaluate effective chemical solutions to significantly reduce or eliminate H₂S contaminants in our production operations. In field tests we confirmed that H₂s and sulfur hit targets of eliminated levels. I am pleased to recommend Alexandros, Inc. for decontamination of water, oil, and gas”.
